## EDUCATION

**Baylor University,** Waco, Texas                                                                                    July 2025 – May 2027
Master of Business Administration (MBA) & M.S. in Information Systems
**Relevant Coursework**: Corporate Finance, Strategic Marketing, Business Analytics, Management of Information Systems, Database Management, Strategic Management, Organizational Behavior, International Management, Advanced Python

**Obafemi Awolowo University,** Ile-Ife, Nigeria                                                             Aug 2016 – Dec 2021
BSc. Civil Engineering | GPA: 3.3/4

## WORK EXPERIENCE

**Senior Software Developer** (Bubble / No-Code Specialist) | Di9ital Ltd. | Remote                      Mar 2025 – June 2025
- Led client onboarding initiatives that directly contributed to over $100K in new business, by aligning technical delivery with strategic client goals and identifying scalable project solutions.
- Managed and scaled the development team by hiring and onboarding two engineers, implementing structured code reviews and delivery checkpoints that doubled project turnaround speed and reduced costs by 25%, while improving overall client satisfaction
- Architected and co-developed cross-platform applications, collaborating with internal teams to define scalable system architecture, UX flows, and logics for high-performance delivery.

**Senior Software Developer** | We Make MVP Inc. | Remote                                              July 2024 – Feb 2025
- Led a team of designers and QA testers to develop AI-driven wedding task and budget generation software (Nupt AI), using Bubble.io and Google Gemini API, achieving 99% consistency in task and budget outputs despite challenges with AI unpredictability.
- Collaborated with developers from Ukraine and South Africa to integrate and synchronize multiple app features, ensuring on-time and within-budget project delivery for the AI wedding planning software.

**Lead Front-End Developer** | Blueshirt Inc. | Remote                                                  July 2022 – June 2024
- Led efforts to transition the platform from MVP to a full-scale application, addressing scalability challenges as the user base expanded, leading to a 100% increase in user base.
- Promoted to Lead Front End Engineer, managing the old codebase on Bubble.io while developing the new one, ensuring the platform remained operational with over 98% uptime during the three-month migration.

**Product Manager** | Aza Global Inc. | Lagos, Nigeria                                                  Jan 2022 – Dec 2022
- Spearheaded the launch of QPay, a fintech MVP, by defining product scope and go-to-market strategy, resulting in 100+ users and $3,000 in transactions within two weeks.
- Implemented data privacy and anti-fraud protocols to meet regulatory standards, ensuring a secure user experience and enabling smooth market entry in a compliance-heavy environment.

## PROJECT

**Xophie.ai**                                                                                                Jan 2025 - Present
- Designed and developed an AI-powered meeting assistant and agents with real-time transcription and summarization using AssemblyAI Speech-To-Text STT, Cartesia Text-To-Speech TTS, OpenAI, GPT models, and WebSockets.
- Treated as a hands-on learning project in building intricate AI systems, focusing on Next.js, Node.js, Python, prompt engineering, live data streaming, and iterative product refinement.

## VOLUNTEERING EXPERIENCE

**Co-Founder |** NoCode Flux                                                                                 Jan 2023 - Present
- Built a 189+ member community to democratize access to technology by training individuals in no-code tools through hands-on workshops. Matched 11 young men and women with 6 startups, fostering inclusion, employability, and economic opportunity.

**Alumni Manager |** AIESEC                                                                                  Aug 2018 - July 2022
- Strengthened alumni relations through newsletters and online engagement, while supporting new recruits with mentoring and instructional content.

## ADDITIONAL

**Certification:** University of Pennsylvania (Coursera), Entrepreneurship Specialization, Customer Analytics            April 2024
**Technical Skills**:Python, JavaScript, SQL (PostgreSQL), Firebase, Bubble, Flutter, MS Excel, Git, Docker, GitHub Actions, FastAPI, OpenAI API, Hugging Face Transformers, AssemblyAI, LangChain, WebSockets
**Hobbies**: Traveling, Photography, Networking, Tennis
